THAT OPTIMIZES YOUR LIFE

Responsive. Intuitive. Habitual.

OLIVIA PEDERSEN
Innovation Tools + Techniques
Spring 2018

A DYNAMIC WORKFLOW CALENDAR APP THAT OPTIMIZES YOUR LIFE

RESPONSIVE. INTUITIVE. HABITUAL.

Eliminate the 9-5 grind.

This tool will help you track progress of your work. Help plan your weekly work-flow. Stay on track. Optimize working hours by make your working hours as effective as possible. Through programming your schedule when you work best so you won't be at work mentally or physically when you don't need to or want to.

Objective:

Personal growth: learn about yourself and the way you want to work day in and day out.

By analyzing a persons unique productivity, best practices, and finding out what environments prosper good ideas this app will learn and recognize patterns in a persons working habits to see where time and process could be optimized. It will also get to know its user with questionnaires invented to specify individualisms. Additionally, it will look for areas of time wasted and suggest alternate or crossover activities for those times building the user a custom calendar.

PROBLEM

A creative staring at a computer screen when the idea or creative juices just aren't flowing is NOT productive. Everyone works at different paces and are most productive in different environments. This tool's aim would be to help a person own their creative process by understanding the best ways they work, at what times, and in what environment. With interactive questionnaires that can hone in on what a persons unique work style and flow is.

USERS

USERS: Inspired and created for creatives of all types, however, it will be effective for anyone with a busy, dynamic life.

STAKEHOLDERS: Workplaces & employers that want to optimize their employee 's time at work.

STEP 1: Download app

STEP 2: Take personality/work style analysis questionnaire.

STEP 3: Enter weekly schedule into app calendar.

STEP 4: Input unproductive times / work style dislikes.

STEP 5: Input productive times / workstyle preferences.

STEP 6: Generate weekly calendar from above input.

STEP 7: Week by week follow calendar and input likes and dislikes to optimize calendar suggestions and work style and place progression offered from app.

SITUATION

This app will be accessible from any phone, computer, tablet, any digital device that is accessible on a daily basis. It will be accessible from app stores unilaterally.

SOLUTION

By analyzing a persons unique productivity, best practices, and finding out what environments prosper good ideas this app will learn and recognize patterns in a persons working habits to see where time and process could be optimized. It will also get to know its user with questionnaires invented to specify individualisms. Additionally, it will look for areas of time wasted and suggest alternate or crossover activities for those times.

END PRODUCT

The goal will be to design the questionnaires for customization, and the user experience of the app. User interface will come last in design.

Doo - Get Things Done 4+

Become a more productive you, one card at a time.

WHY DOO?

It's easy to procrastinate your to-do list without a clear first step. Tasks with large goals can feel impossible to finish.

Doo helps you procrastinate less. Your reminders become cards that are easy to start and easy to finish. The streamlined edit screen encourages you to create tasks that can fit on a digital index card. Each card shows up in a stack — instead of a list — so you can focus on one thing at a time.

BUILD BETTER HABITS

Pick a few tasks each day and snooze the rest. Doo helps you create more consistent, sustainable habits. Reduce your anxiety and become a more productive you, one card at a time.

AWARDS AND NOMINATIONS

- * Best of the Mac App Store 2016
- * App Store Best of February
- * App Store Best New Apps
- * Two-time Webby Award nominee

IDEA INSPIRATION: Reminds you to get things done in a hierarchy. Also, helps for complete tasks and up productivity by finishing one to-do at a time to streamline focus and reduce stress.

Daily | Time tracking 4+

Looking for an easy way to get insights in your daily activities? Meet Daily, world's most convenient time tracking companion for professionals, loved by many due its simplicity. It works by asking what you are doing in a discrete manner.

Each time Daily asks you what you are doing, a sample is recorded. Together with other information such as when you have started working and have stopped working, Daily is able to create accurate time sheets. This new but proven concept results in a discipline-free and easy way of doing time registration.

Although simplicity rules, Daily offers powerful features enabling you to make Daily fully compatible with the way you work.

Daily enables you to:

- Discover the duration per activity, accurate to the minute!
- View and edit your time sheets for a specific day, week, month or even year;
- See when you've started and stopped working;
- Register activities while you've been away from your computer;
- Automatically record a pre-defined activity using silent-mode;
- Control Daily using global keyboard shortcuts;
- Automatically start & stop registering on specific moments using the scheduler;
- Export your data allowing you to import data into 3rd party applications such as Toggl;
- Automate tasks using AppleScript;
- ... and much more!

IDEA INSPIRATION: Smart software that learns tracks and learns about what you do with your time and further learns about your daily workflow. This is a good example of how an app could help optimize your schedule by seeing crossover, time savers, or reorganize a workflow to upgrade productivity.

Timelime | Time tracking 4+

Timelime is the easiest and most beautiful way to track and visualize your working hours.

Timelime is the perfect assistant for:

- Freelancers and independent contractors who have to track their time spent on projects
- Students who want to spend more time studying by monitoring their daily/weekly/monthly workload
- Individuals who are interested in how they spend their work time
- People who wish to reduce the amount of time not being productive
- Anyone else who likes simple yet powerful time tracking and visualization

Timelime's key highlights are:

SYNCHRONIZATION - Keep your data in sync using the optional synchronization setting. When enabled your data syncs automatically and immediately on all your Macs and iPhones via iCloud, Dropbox, or WebDAV.

UNOBTRUSIVE INTERFACE - When timing, Timelime hides away in the menu bar. Even the menu bar icon is customizable to make it as unobtrusive as you like. Start and stop the timer from the menu bar or by a hotkey.

TASK GROUPING - Organize your tasks by groups using simple drag and drop. Timelime supports up to two levels of subtasks.

CALENDAR VIEW - View your daily work activity in a unique continuous calendar, which also allows you to select date ranges for review.

BEAUTIFUL CHARTS - Whether you want to display your workload in a bar, line, or pie chart, Timelime enables you to generate customizable and beautiful charts.

CONSISTENCY ACROSS TIME ZONES - Are you working in different time zones? Timelime automatically takes care of time shifts; your timings and reports will always be time zone independent.

INTELLIGENT IMPORT - Never worry about duplicate tasks or timings when importing any Timelime data.

EXPORTING - Timelime offers selective export of both your data to CSV or XML, and your charts to PDF, PNG, or JPG for easy import into your reports.

INTUITIVE INTERFACE - Timelime makes time tracking intuitive with its clean and simple interface. Start time tracking right away. It just works!

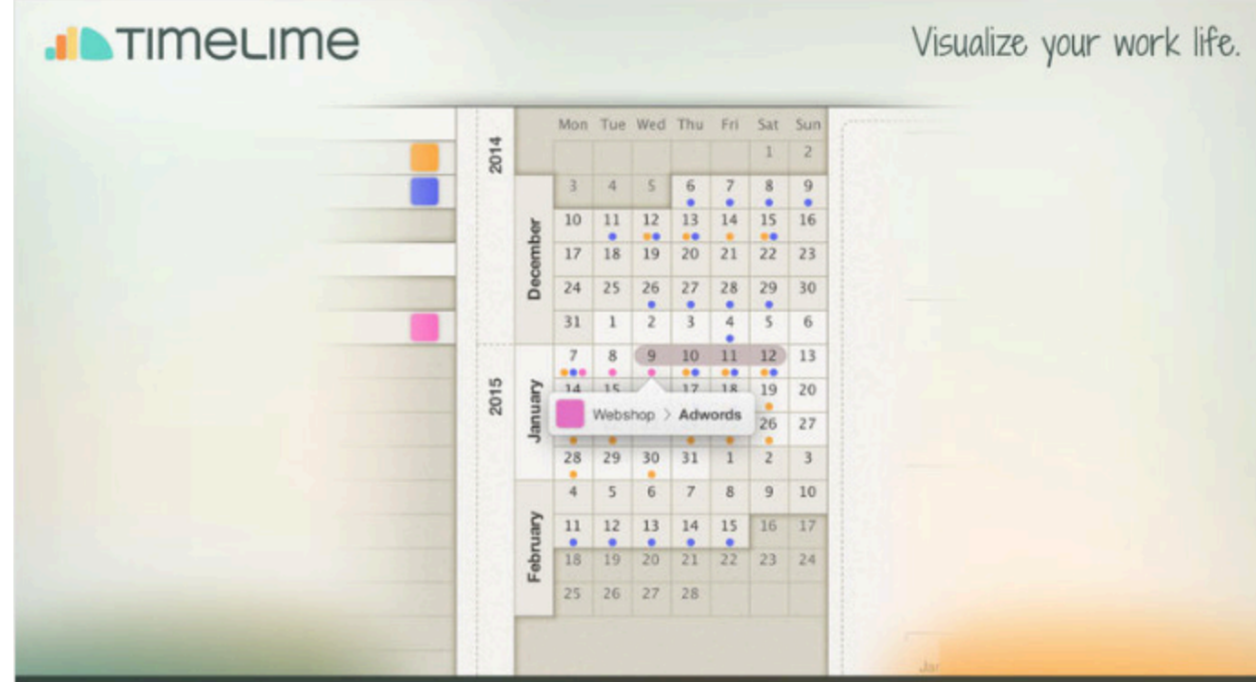

IDEA INSPIRATION: BACKEND RESEARCHERS WITH CONSTANTLY BE RESEARCHING AND UP TO DATE ON STUDIES OF BEST WORK PLACE PRACTICES AND IMPLEMENT FINDINGS INTO APP ATTRIBUTES.

IDEA INSPIRATION: Convenient tracking location

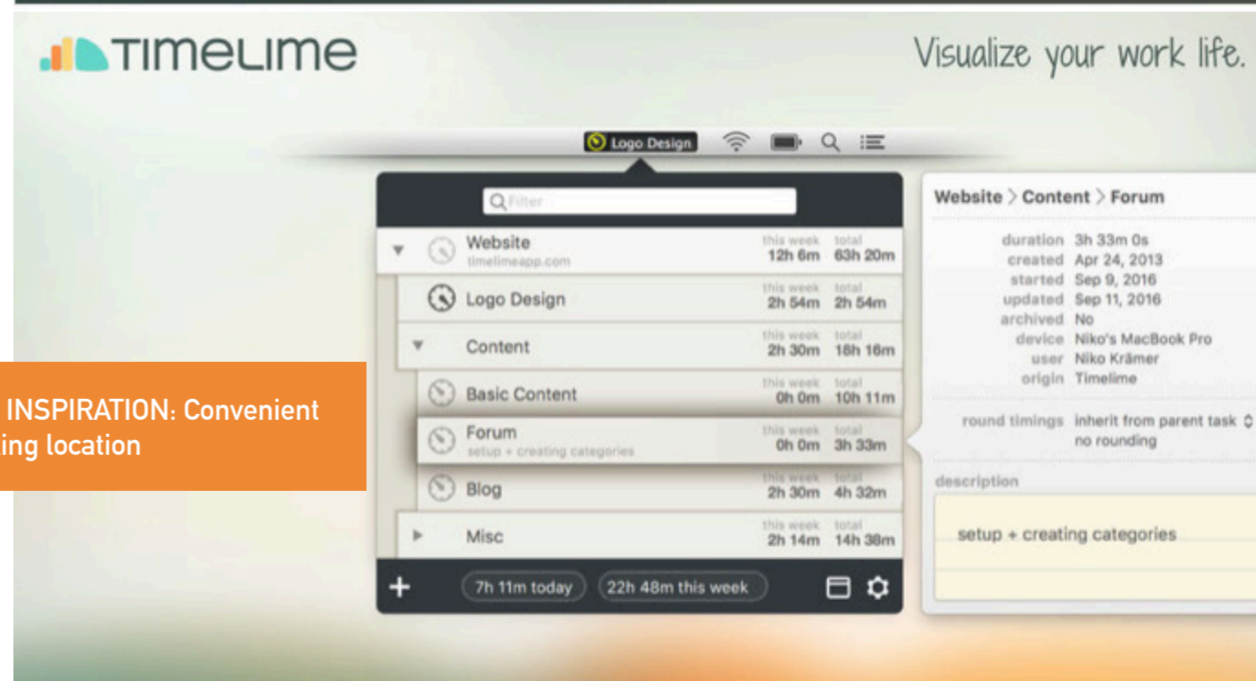

IDEA INSPIRATION: Always have the most updated app that you can access from everywhere ensuring accurate tracking + suggestions.

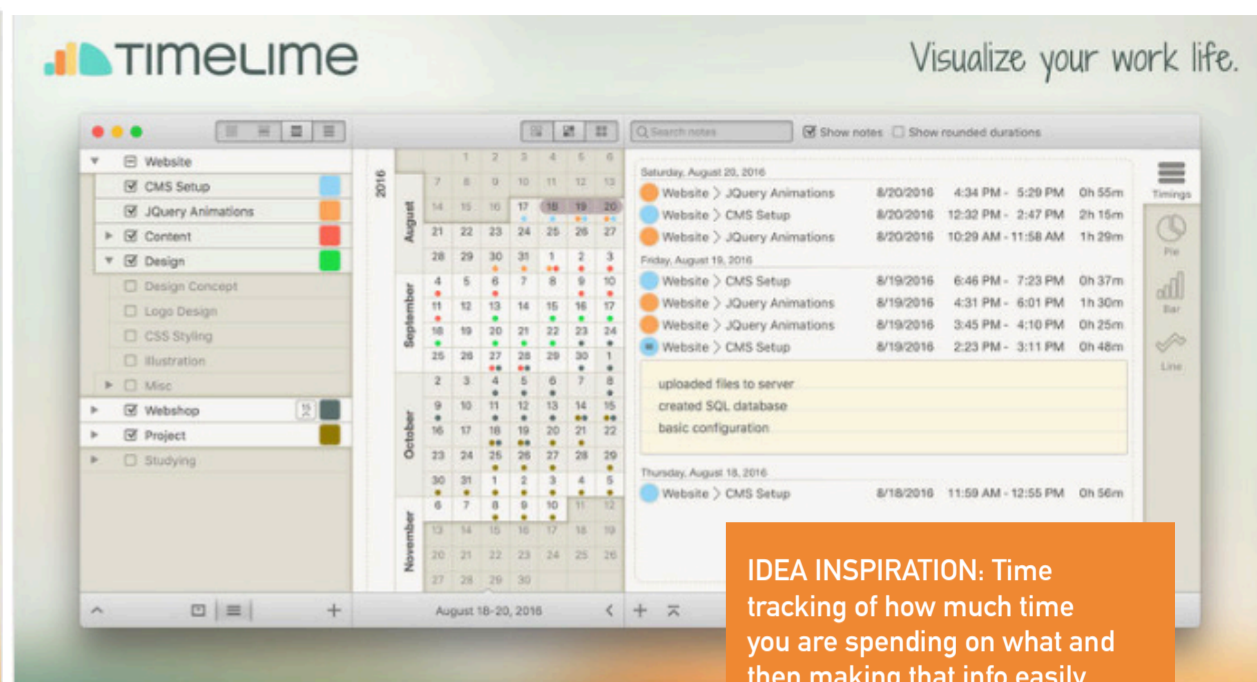

Synchronize with Timelime for iPhone using iCloud, Dropbox, or WebDAV.

View your past work activity in a continuous calendar and select a date range for review.

Quickly access common actions and information right from the menubar.

IDEA INSPIRATION: Time tracking of how much time you are spending on what and then making that info easily

Open the app's main window to edit your timings or visualize your time spent on tasks.

IDEA INSPIRATION: Providing analysis on how you work, what you work on, when, and how productive you are.

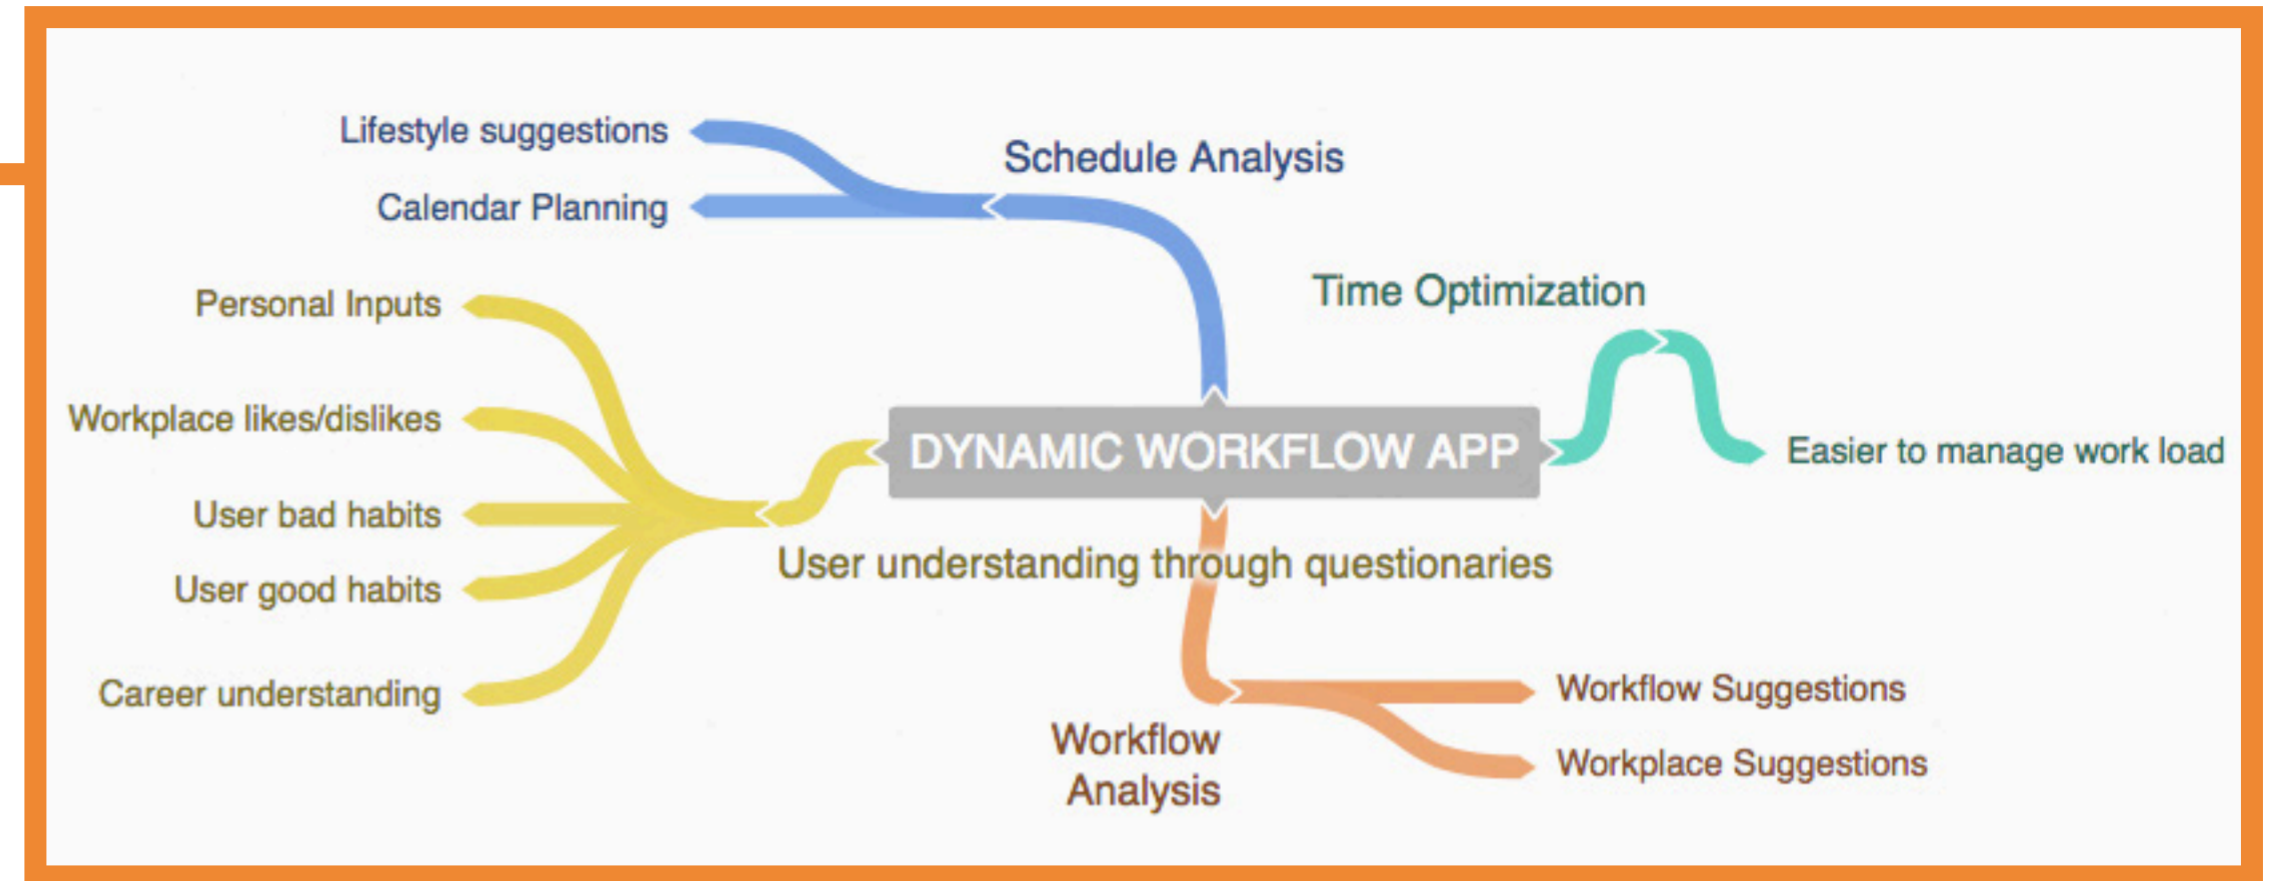

Display your workload in beautiful charts.

Other Features:

- Task archiving
- Time rounding
- Simultaneous timers
- Idle time detection and resolving
- Undo/Redo support
- Backup and restore your data manually
- Automatic Backups
- Adapts to localized date and time formats
- Customizable CSV import
- Add notes to your tasks and timings
- Manually add, edit, or delete timings
- Define global hotkeys for common actions
- Easily adjust the start time after starting the timer too late
- Retina display support

Please note that Timelime only supports the Gregorian calendar.

CUSTOMIZABLE DASHBOARD

SO THE EVERY USER CAN ADJUST THE LOOK AND INTERACTION OF THE APP JUST HOW THEY WANT. THIS WILL PRIMARILY BE THROUGH COLOR AND LAYOUT

THE NINEtoFIVE DIFFERENCE

VALUE ADD

What makes the NINEtoFIVE app like none other you have ever used is the comprehensive user + app interaction. This app is like having a personal assistant that knows your ins and outs. The main aspect of this app is the input a user will continuously be asked (by the app) to give for the app to analyze its' user and then take that input and upgrade their schedule, workflow, and offers suggestions of improvement in all aspects of their inputted life. This input attainment will start from sign-up with an initial set of questionnaires that focus on the users work style, lifestyle, and environment. Then they will be asked to give input in a once weekly feedback questionnaire. Additionally, customization of the user interface to mesh with colors that the user defines as productive is an element that no other apps are doing.

THE SCIENCE BEHIND THE QUESTIONNAIRE

Our team of psychologists has developed and tested our unique questionnaires to pull individual traits from users to define what type of workflow is best for them. The three types of questionnaires that we lead with is workstyle, lifestyle, and work environment; by first deciphering which type of personality the user is we can begin to further breakdown what information, suggestions and additional questions we will ask them week over week. The user can also reject any category we assign to them and build their "user type" manually (although that is not suggested).

LIFESTYLE

BIZ MODEL

REFLECTION:

This project has been a great learning experience. Throughout the entire process, the idea has evolved into what it is today. If I were to pursue the development of this idea to fruition I can only imagine where it would end up! That is what is so exciting about innovations, the unforeseen ways they will evolve. One of the biggest challenges for this project was keeping the idea a manageable size. This app idea is still quite abstract in mind, which leads to exponential detours when I brainstorm how it would actually materialize. However, with the help of experts that lead the thought in productivity and human behavior, I think that boundaries of ideation could be more easily set. If I were to continue the development of this app, that would be my next step, finding my team. For this team I would need to step out of my current network for some areas, to find the best persons for the job. Also, funding would be my next step. Here I feel I am set up to start gaining investors because of my final project presentation.
